

# Application for Underground Supply in an Overhead Area

**A site plan must be included with this completed application form.**

*Please complete in BLOCK CAPITALS*

Sections 1, 2, 4, 5, 6, 7 and signature box must be completed in order for application to be processed.

## 1. Name of applicant (for tax invoice purposes)

Title (Mr/Mrs/Ms/Miss): \_\_\_\_\_ Given names: \_\_\_\_\_

Surname: \_\_\_\_\_

Company name (if applicable): \_\_\_\_\_

ABN: \_\_\_\_\_

## 2. Postal address of applicant

Address: \_\_\_\_\_

Town: \_\_\_\_\_ Postcode: \_\_\_\_\_

Phone: \_\_\_\_\_ Mobile: \_\_\_\_\_

Fax: \_\_\_\_\_ Email: \_\_\_\_\_

## 3. WAPC reference number (subdivisions only)

Green title  Building/Survey strata WAPC Ref no: \_\_\_\_\_

## 4. Work site (address at which the underground supply is required)

Business/company name: \_\_\_\_\_

Contact person: Mr/Mrs/Ms/Miss \_\_\_\_\_

Address: \_\_\_\_\_

Town: \_\_\_\_\_ Postcode: \_\_\_\_\_

Phone: \_\_\_\_\_ Mobile: \_\_\_\_\_

Fax: \_\_\_\_\_ Email: \_\_\_\_\_

## 5. Electrical consultant/contractor

Business/company name: \_\_\_\_\_

Contact person: Mr/Mrs/Ms/Miss \_\_\_\_\_

Address: \_\_\_\_\_

Town: \_\_\_\_\_ Postcode: \_\_\_\_\_

Phone: \_\_\_\_\_ Mobile: \_\_\_\_\_

Fax: \_\_\_\_\_ Email: \_\_\_\_\_

### Mandatory location of pillar

### 6. Total number of dwellings/lots

Number of dwellings/lots: \_\_\_\_\_

### 7. Maximum load requirements

Amps/phase: \_\_\_\_\_

Single Phase    Rural Two Phase    Three Phase

### Please note:

- Horizon Power offers, subject to the attached terms & conditions (Terms and Conditions), a subsidised price for the conversion of an overhead connection to a standard underground point of supply, (pillar), up to three lots / dwellings in an existing Low Voltage (LV) overhead area.
- A maximum load limit of 63 amps single phase, or 32 amps per phase three phase applies to applicants serviced by the North West Interconnected System (NWIS). Lower limits may apply to applicants outside the NWIS. Please refer to the Western Australian Electrical Requirements Section 10 and the Western Australian Distribution Connections Manual 2015 Section 7.8.1.
- Horizon Power reserves the right to place the pillar in a location at the front boundary that enables it to achieve a second connection from the neighbouring green property.
- All electrical work on the customer's property/premise is the responsibility of the customer's electrical contractor.
- To qualify for the subsidised price for an underground point of supply, all Terms and Conditions must be met. Refer to the Horizon Power website ([www.horizonpower.com.au](http://www.horizonpower.com.au)) for the fees and charges associated with this application.
- If you do not satisfy the Terms and Conditions, acceptance by the customer of a separate formal quote from Horizon Power will be required before Horizon Power will commence the requested work.
- This application form is not applicable if your project involves:
  - the supply of electricity to a connection with a total maximum load of greater than 30 kVA or 10% of the relevant systems peak load;
  - more than three domestic dwellings on a single green title lot;
  - a commercial or industrial property;
  - CT metering that will result in an increase in the load capacity at the relevant site; or
  - a subdivision that requires Horizon Power to undertake headworks to connect the subdivision to Horizon Power's network.
- If you wish to proceed with this application, please read the attached Terms and Conditions and then sign and return this application to Horizon Power.

---

On signing this form as the duly authorised representative, the signatory accepts liability for payment for the pole to pillar works undertaken by Horizon Power in connection with this application per domestic dwelling/lot and also accepts that the Terms and Conditions attached have been read, understood and agreed.

### Signature of applicant/customer

Signed by applicant/customer: \_\_\_\_\_ Date: \_\_\_\_\_

## Submission of this application

Please post, email or fax this application form to your nearest Horizon Power office (details below)

### Terms and conditions

- 1. Terms and conditions:** These terms and conditions form part of the contract unless modified in writing by an authorised representative of Horizon Power. References to “customer” are to be read as a reference to the “applicant” and vice versa.
- 2. Credit check:** Horizon Power has the right to make credit inquiries as to the credit worthiness of a customer and retains the right to decline to perform or further perform the services whenever Horizon Power does not receive an acceptable credit reference (in its sole opinion). The customer acknowledges and agrees that it shall have no claim or right or cause of action against Horizon Power by reason of Horizon Power declining to perform or further perform the services in the circumstances described in this clause.
- 3. Force Majeure:** Horizon Power will not be liable to the customer for any loss, damage or expense caused in connection with this contract by force majeure. “Force majeure” means any cause or event which is not reasonably within the control of Horizon Power including but not limited to Acts of God; strikes; lockouts; stoppages or restraints of labour or other industrial disturbances; wars, acts of public enemies, riot or civil commotion or sabotage; fire, explosion, earthquake, landslide, flood, washout, lightning, storm or tempest; breakdown or an accident to plant, machinery, equipment, lines or pipes howsoever caused; failure of suppliers to supply equipment or machinery; and restraints, embargoes or other actions of any government.
- 4. Consequential loss:** Horizon Power’s liability to the customer in connection with this contract is limited to damages for direct and foreseeable losses attributable to a breach of this contract. Neither party will be liable to the other for any consequential or indirect loss including loss of production, loss of revenue, loss of profit or anticipated profit, loss of reputation, business interruptions of any nature or loss of opportunities.
- 5. Modification:** A purported modification, variation or amendment of this contract including the scope of works or any waiver of any rights of any party or any approval or consent shall have no effect unless in writing and signed by both parties.
- 6. Application of acts and by-law:** Nothing in this contract has the effect of constraining Horizon Power or placing any fetter on its statutory rights, duties, powers and functions including those contained or referred to in any law.
- 7. Fees and charges:** The fees and charges payable by the customer to Horizon Power in connection with this application and the works are available on Horizon Power’s website at [www.horizonpower.com.au](http://www.horizonpower.com.au). All fees and charges are based on installation of a single pillar unless otherwise stated and must be paid in accordance with Horizon Power’s payment terms as set out in any invoices issued by Horizon Power in connection with this contract.
- 8. Additional charges:** Costs for reinstatement works are not included unless specifically stated. Costs for works associated with other services are not included unless specifically stated. Cancellation or revision of works may result in an administration fee.

- 9. Responsibility for boundaries and pillar location:** The customer is responsible for accurately pegging all necessary boundaries to enable accurate placement of cables in the allocated alignment. Horizon Power has the right to place the pillar in a location at the front boundary of the customer's property that enables it to achieve a second connection from the neighbouring property. Installation of, and connections to, the point of supply, are required to be made in accordance with the *Western Australian Electrical Requirements*.
- 10. Responsibility for environmental clearance** The customer is responsible for obtaining all necessary environmental clearances including but not limited to Native Title, Aboriginal Heritage, Native Vegetation and Heritage Listed Building or Object, associated with the electricity infrastructure work to enable the electricity supply. Horizon Power has no liability for a customer's failure to obtain any required environmental clearances.
- 11. Subsidised rate:** To qualify for the subsidised rate for an underground point of supply, new lots and/or dwellings must:
- be located within the Electricity Licensing Area Boundary;
  - be located in an overhead area;
  - be placed in Horizon Power's preferred or acceptable location;
  - have a maximum load requirement of 63 amps single phase or 32 amps per phase three phase;
  - be ready and pegged for immediate installation of the pillar; and
  - not have SES charges owing.

In addition:

- No more than three dwellings/lots can be connected as a result of a subdivision. This includes existing connections.
  - There must be no requirement to remove or relocate an existing overhead line as a result of the subdivision.
  - Suitable low voltage overhead mains must exist within 60 m of the lot/dwelling boundary where the pillar is to be installed.
  - The route from the existing low voltage overhead mains to the proposed pillar location must be suitable for the installation of low voltage underground cable, as determined by Horizon Power in its sole discretion.
  - The same developer/owner/customer must not have submitted an application for an underground connection for the same or adjacent lot/dwelling within the previous three years.
  - A company, organisation, person or group of persons must not be progressively seeking Pole to Pillar connections for an area that, in Horizon Power's opinion, should be developed as a standard underground residential subdivision.
  - Where applicable, common property is created to allow consumer mains to be connected to the pillar and or sub-mains to be connected to the site main switchboard.
  - Please return completed form(s) with site plan to your nearest Horizon Power regional office.
- 12. Formal quote may be required:** If Horizon Power considers that you do not satisfy the above Terms and Conditions, acceptance by the customer of a separate formal quote from Horizon Power will be required before Horizon Power will commence the requested work. The formal quote will be provided to you free of charge.

You will be required to pay Horizon Power for any amounts requested by Horizon Power in relation to re-doing or varying the formal quote due to any material amendment to your project.

The formal quote will be subject to the terms and conditions specified in the formal quote.
